ADITYA DATTA

Kolkata, India | +91 9163213412 • dattaaditya74@gmail.com • https://www.linkedin.com/in/aditya-datta-23a517260/

SUMMARY

Computer Science and Engineering Graduate (2026) with strong fundamentals in object-oriented programming (Java, Python), data modeling, and logical reasoning. Enthusiastic about learning new technologies and highly motivated to develop enterprise solutions using SharePoint, Power Automate, and Power Pages. Experienced in UI/UX design, building scalable web applications, and collaborating seamlessly with global teams. Proficient in the MS Office Suite and eager to drive innovation and automation as a Developer Intern.

EDUCATION

Kalinga Institute of Industrial Technology | Odisha, India May 2026

Bachelor of Technology (B.TECH)—Computer Science | CGPA: 9.2

- Awarded by the university for making a **Complaint Management System** app, starting to deploy it.
- Organized a tech hackathon in our **University** with 100+ students.

PROFESSIONAL EXPERIENCE

Highradius | **Functional Consultant Intern** | Hyderabad, India Jun 2025 – Present

- **Fortune 50 Implementations:** Led the end-to-end implementation and configuration of Order-to-Cash (O2C) solutions for highly complex, global enterprise clients, including PepsiCo and Xylem.
- Collaborated with technical teams to seamlessly integrate HighRadius modules with client ERP systems **SAP, Oracle, NetSuite** using APIs and secure data transfer protocols
- Tailored UI views and rule-based automation engines to meet specific client use cases, achieving **90%** automation for complex collections scenarios.

PROJECTS

Blockchain-Based Document Verification with OCR | Source-Code Jan 2023 – May 2024

- Built a Hyperledger Fabric-based system for secure certificate verification, deploying smart contracts that processed **10,000+** records and reduced verification time by **80%** using cryptographic hashing.
- Orchestrated infrastructure across a **4-node** blockchain network using **Docker** and **Kubernetes**, achieving **99.9%** uptime and exposing services via REST APIs with sub-**200ms** response times.
- Deployed with **Docker** and **Kubernetes**, exposing services via **REST APIs**.

HireTrack – Job Application Tracking System | Source-Code Jan 2022 – Nov 2022

- Developed a job application tracking platform using React (Hooks, Context API, React **Router, Axios)** with **Node.js (Express.js, REST APIs)** and **MongoDB (NoSQL)** backend.
- Implemented **JWT-based authentication** with **role-based access control (RBAC)** for applicants, recruiters, and admins.
- Integrated **real-time job status updates** via **WebSockets (Socket.IO)**

SKILLS & OTHER

Core Competencies: Object-Oriented Programming (Java, Python), Data Modeling, UI/UX Design Principles, Logical Reasoning
Microsoft Ecosystem: MS Office Suite (Excel, PowerPoint, Word, Outlook), SharePoint Platform & Power Pages
Software Engineering Practices: Technical Documentation, Unit Testing, Agile Development, CI/CD Pipelines, Git/GitHub
Frontend Development: React.js (Hooks, Context API, Redux Toolkit, React Router), Flutter (Dart, Provider, BLoC Pattern)
Backend & Cloud: Node.js (Express.js, REST APIs), MongoDB (Mongoose ORM), Firebase, AWS (EC2, S3)
